Here are some key facts about this hair invader:

**Lice can’t fly or jump**
They move by crawling through hair.

**Proven solutions are available without a prescription**
Vamousse Lice Treatment is clinically proven and available OTC.

**You can’t get lice from your pets**
They’re spread from (human) head-to-head contact.

**Between 6-12 million U.S. kids 3-11 years old get head lice each year.**
That’s 1 in 5 kids in the US each year!

**Lice is the #2 childhood health concern behind only the common cold.**

**Pesticide-resistant super lice are on the rise**
But pesticide-free Vamousse kills them and their eggs.

**Lots of moms (and dads!) will contract lice from their children:**
Check entire family for lice weekly

**Average head lice life cycle is 40 days.**

**One missed nit**
during treatment, results in re-emergence 7-10 days later

**Reduce the risk of infestation:**
Don’t share

**Itching can take 4-6 weeks to show up**

**2 weeks after exposure**

**50-150 eggs**

**7-10 days**

**Nymph**

**7-10 days**

**Adult**

**CDC**
TREATMENT MOUSSE
- Clinically proven to kill super lice & eggs in 1 treatment
- Easy to apply foaming mousse targets lice and eggs where they hide

DEFENSE SHAMPOO
- Kills recently contracted super lice before detection
- Also makes a great follow up to treatment

REPELLENT SPRAY
- Repels lice from hair for the entire school day
- Unscented when dry

FOR TREATMENT
“My child has lice...”

FOR DAILY USE
“Dear Parent, a case of lice was identified at your school...”
